

OEM Package's examples

This document is a part of the BioLogic OEM Package and is protected by the terms of the OEM Package **licence** as well as other intellectual property rights owned by BioLogic SAS. This document may only be used for non-commercial purposes such as for the integration of BioLogic equipment to larger technical solutions manufactured and/or delivered to end-users.

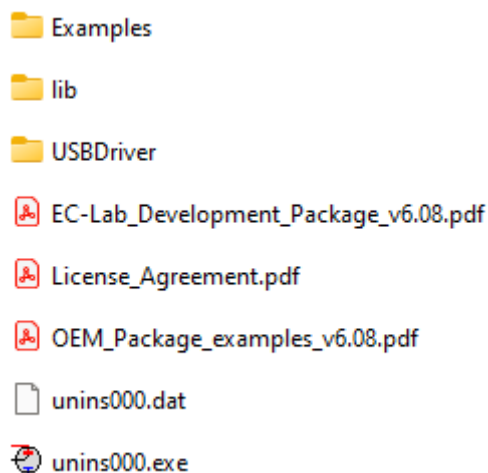

1. List of languages of OEM package's examples.

The examples provided with OEM Package are in the following languages:

- Labview
- C/C++
- Python

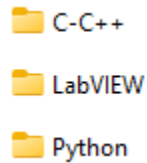

2. Package Contents

In the installer path we find the repositories below:

lib: contains all DLLs that the examples need and all the technique parameters that can be loaded.

Examples: contains the examples in different languages.

Example's file contains commented source code and targets of compilation (32 bits & 64 bits), if applicable.

EC-Lab Development Package.pdf: the User's Guide with the history of all version of the package and the explanations of the different functions of the Eclib DLL.

3. Compatibility table

This table lists the compatibility of each examples with the different targets of compilation and the version used for its development.

	32 Bits	64 Bits	Tested in Version
Labview	✓	✓	2022 Q3
C/C++		✓	Visual Studio 17 2022 CMake 3.20
Python		✓	3.12.0
